

Minjae Lee

Energy Materials and Battery Interface Research Candidate

minjae.lee@example.com | Seoul, Republic of Korea | github.com/example-05

FICTIONAL TEST DOCUMENT - all names and details are fabricated

RESEARCH INTERESTS

Solid-state batteries, electrochemical characterization, and thin-film interfaces.

EDUCATION

B.S. in Materials Science and Engineering - Mirae Institute of Technology (fictional), 2021-2025

- GPA: 3.92/4.50; expected graduation: February 2026. Relevant coursework: Electrochemistry, Materials Thermodynamics, Surface Analysis.

RESEARCH EXPERIENCE

Electrochemical Materials Group | Research Intern | 2024-2025

- Prepared coin cells under a supervised glovebox protocol and logged charge-discharge data across 60 cycles.
- Analyzed impedance spectra to compare electrolyte additives and summarized trends for internal discussion.

SELECTED PROJECT

Interface Stability Study | Capstone Project | 2025

- Tracked capacity retention across three additive conditions and built a Python notebook for reproducible plots.

TECHNICAL SKILLS

Python, Origin, XRD, EIS, SEM sample preparation, glovebox safety, Git.

PUBLICATION / PRESENTATION

M. Lee, 'Electrolyte Additives and Interfacial Resistance,' Departmental Poster Session, 2025. (Fictional)
